

Use of cognitive tests to assess fitness to drive – Possibilities and limits

Margit Herle¹

¹ SCHUHFRIED GmbH

This workshop will give participants an in-depth insight into the procedures of fitness to drive testing. Relevant cognitive dimensions, test validity, suggested cut-off scores and norm sample selection will be discussed as well as the challenge of testing special groups. At the end of the workshop, participants should have gained a better understanding of the possibilities and limits of psychological tests for their practical work.

Participants are encouraged to bring their own cases and discuss them.

If required special questions or other topics requested can be sent in advance to herle@schuhfried.at.

Participants are invited to bring their smartphone.

Keywords: traffic psychological assessment, fitness to drive, cognitive tests, validity, driver testing
